Once installed in your extension plugin, click on the "Metamask" icon and click on "Add token".

The screenshot displays the Metamask extension interface. At the top, the network is set to "Main Ethereum Network". The main display shows "0 ETH" with a value of "\$0.00 USD". Below this are "BUY" and "SEND" buttons. The interface is divided into "Assets" and "Activity" tabs. The "Assets" tab is active, showing a list of tokens:

Token Icon	Token Name	Value	Action
	0 ETH	\$0.00 USD	>
	0 SLP		>

At the bottom of the assets list, there is a red-bordered button labeled "Add Token".

Select "Custom Token", enter "0x5a731151d6510Eb475cc7a0072200cFc9a3bFe5" into the Token Contract Address.

The screenshot shows a mobile application interface for adding tokens. At the top, there's a header with a fox logo, a star icon, and a circular profile picture. Below this is a sub-header with the fox logo, a dropdown menu set to 'Main Ethereum Network', and a circular icon with a red and blue design. The main title is 'Add Tokens'. There are two tabs: 'Search' and 'Custom Token', with 'Custom Token' being the active one. The form has three input fields: 'Token Contract Address' containing '0x5a731151d6510Eb475cc7a0072200c', 'Token Symbol' containing '\$KING', and 'Decimals of Precision' containing '18'. At the bottom, there are two buttons: 'Cancel' and 'Next'.

Click "Add Token". After which it will appear in your wallet.

The screenshot displays the 'Add Tokens' screen in a wallet application. At the top, there is a header with a fox logo, a dropdown menu set to 'Main Ethereum Network', and a circular token icon. Below the header, the title 'Add Tokens' is prominently displayed, followed by the question 'Would you like to add these tokens?'. A table lists the tokens:

Token	Balance
 \$KING	0 \$KING

At the bottom of the screen, there are two buttons: a grey 'Back' button and a blue-outlined 'Add Tokens' button. The background of the screen features a decorative pattern of dots and lines.
